

# Payment You Trust. Privacy You Deserve.

Settle is a new alternative mobile payment method that protects you, not corporations!

### Absolute Privacy

Unlike other payment methods, we do not sell or share your data.

### Uncompromising Security

We use industry-leading technology to keep your transaction and personal information safe.

### Contactless Payments

Businesses need only scan your unique, one-time use QR code on your mobile device.

Start using Settle+ on your mobile app by following these four simple steps!

### Download

Find and download the Settle app from the app store on your mobile device.

### Phone Number

A unique verification code will be sent via SMS message to your mobile device.

### Name

All we need now is your full name, then you are ready to load or purchase your first voucher.

### PIN

Create a 4-digit pin for future logins.

Load your Settle eVouchers+ bought at any participating ConvenienceUnified onto your mobile app.

### **Buying additional vouchers**

- Settle+ vouchers are available at all participating ConvenienceUnified locations.
- Participating ConvenienceUnified locations will only accept Settle eVouchers+. Settle vouchers will not be redeemable.
- Settle+ vouchers are available in denominations of \$10, \$25, \$50, and \$100.
- Settle+ vouchers must be loaded into your Settle App before being redeemed at any participating ConvenienceUnified.

### **The Settle Philosophy**

Settle works by effectively balancing traditional expectations of privacy with modern convenience. We incorporate easy, contactless payments with a rare level of discretion in today's day and age. Settle runs exclusively on the Global Primex Network, which allows us to set rules which establish our unparalleled level of privacy and security, including eliminating the pervasive practice of selling personal data to third parties.

#### **About Global Primex LLC**

Global Primex LLC, headquartered in Miami, FL with an office in Chicago, IL, is a member of the Global Primex international group of FinTech and RegTech companies providing innovative, secure, and private payment solutions to consumers and merchants, both online and in-store.
