

Payment You Trust. Privacy You Deserve.

Contactless

Private

Secure

Congratulations! You're one step closer to the freedom of making safe and secure payments with Settle. Here are the four easy steps for you to use your Settle eVoucher+:

Download

Find Settle on our online database or in your app store and download it onto your mobile device.

Phone Number

We will send a verification code via an SMS message to the phone number of your choosing.

Name

All we need now is your full name, then you are ready to load your Settle eVoucher+ and/or purchase your first Settle eVoucher.

PIN

Create a 4-digit pin for your Settle account, which you will use every time you log in.

Settle is a proud partner of **ConvenienceUnified**. You may purchase Settle vouchers at all participating ConvenienceUnified locations.

We hope you enjoy using Settle, a private and secure way to pay.

Data Remains Secure

Businesses need only scan your unique, one-time use QR code on your mobile device to complete a transaction.

Payments are Private

Unlike other payment methods, we do not sell your data or profile you based on your spending habits.

Statements are Discrete

The things you buy and the places you buy them from will never show up on your credit card or bank statements.

Here are a few important details as you continue to use Settle.

1

Initial Spending limit

You may spend up to \$500/year after signing up with Settle. Want to spend more? No problem! All you will need is your ID and a selfie to unlock up to \$25,000 per year in spending.

2

Merchant Network

Visit the Settle App or ConvenienceUnified to find out where else you can use Settle, or tell us which business we should add to our network.

3

Buying additional vouchers

You can buy more Settle eVouchers+ at all participating ConvenienceUnified locations; or you can use a credit card or bank transfer right in the App! Please note that vouchers bought in the app are not accepted at all locations, please refer to our list of merchants before buying.
